EXPERIENCE

MillerKnoll — Technical Analyst Intern

May 2025 — August 2025 | Zeeland, MI

- Developed scripts and automation tools to validate user accounts across enterprise systems via REST APIs.
- Researched, documented, and presented solutions for process automation and system migration efforts.

WolverineSoft Studio — Gameplay & UI/UX Programmer

May 2024 — May 2025 | Ann Arbor, MI

- Implement gameplay mechanics, particle effects, player progression systems, and UI/UX for semester-long game projects.
- Collaborate with multidisciplinary teams using agile workflows for iterative design, testing, and optimization.

Michigan Quantitative Computing — Co-Vice President

April 2024 — Present | Ann Arbor, MI

- Help establish the organization by recruiting members, managing operations, and coordinating project tracks.
- Co-lead research initiatives on algorithmic trading, machine learning, and large-scale data systems.

Society of Women Engineers — Outreach Mentor

September 2024 — Present | Ann Arbor, MI

- Enhance technical skills through professional development seminars on industry tools and best practices.
- Mentor K-12 students in STEM via outreach programs, including SWE++ and Scout Out Engineering Day.

FIRST Robotics Competition Team 3357 — Web Developer

August 2022 — May 2023 | Grand Rapids, MI

- Designed and developed the team's website to improve usability, navigation, and competitive documentation.
- Produced and edited the team's annual Impact Award video highlighting achievements and outreach.

PROJECTS

JPMC Code for Good Hackathon

November 2025 | Columbus, OH

- Developed core functionality and the admin dashboard for CLEP Finder Portal, a web platform supporting Modern States Education Alliance to help students explore courses and streamline institutional management of learning data.
- Coordinated team workflow and led the project presentation, delivering a fully functional solution within 24 hours using full-stack technologies.

MHacks University of Michigan Hackathon

September 2025 | Ann Arbor, MI

- Focused on backend set up and UI implementation for Big Houses, a platform centralizing Michigan student housing search with secure, filtered, and personalized recommendations.
- Led development of the main page and supported the team's presentation, ensuring a cohesive and functional prototype for demonstration.
