EDUCATION

University of Michigan — College of Engineering

Ann Arbor, MI

B.S.E. in Computer Science

Expected May 2027

- **GPA:** 3.68/4.00 | **Awards:** College of Engineering Dean's Honor List (Fall 2023 – Fall 2025)
- **Past Courses:** Data Structures & Algorithms, Operating Systems, Machine Learning, Data Mining, Web Systems, Computer Organization, Discrete Math, Linear Algebra, Statistics, Calculus, 3D Technical Art & Animation
- **Current & Upcoming Courses:** Distributed Systems, Database Management Systems, Computer Science Pragmatics, Game Design & Development, Game Engine Architecture

EXPERIENCE

MillerKnoll

Zeeland, MI

Technical Analyst Intern

May 2025 – August 2025

- Automated exchange rate retrieval for Infor ERP via bank API, eliminating daily manual data entry for global audits.
- Developed IT shell scripts for employee offboarding cleanup and created SQL queries to pull enterprise product reports.

Michigan Data Science Team

Ann Arbor, MI

Member

January 2026 – Present

- Collaborated in a 3-student subgroup to implement a reinforcement learning agent for 2D origami inverse design.
- Built a training pipeline that surpassed all benchmarks and maintained optimal model convergence as data scaled.

Society of Women Engineers

Ann Arbor, MI

Member

September 2024 – Present

- Mentored K-12 students during hands-on workshops covering Python fundamentals, binary, debugging, and algorithms.
- Facilitated campus outreach events to introduce middle school cohorts and Scout troops to STEM career paths.

WolverineSoft Studio

Ann Arbor, MI

Gameplay Programmer

May 2024 – May 2025

- Programmed core gameplay mechanics, enemy behaviors, and interactive menus in Unity across 3 production cycles.
- Established persistent, event-driven architectures and translated Figma wireframes into fully functional UI/UX systems.

Michigan Quantitative Computing

Ann Arbor, MI

Co-Vice President

April 2024 – May 2025

- Co-launched and scaled club by recruiting members and advising student-led projects on algorithmic trading and ML.
- Cultivated professional growth by hosting resume workshops and technical coding seminars for portfolio development.

PROJECTS

PaperZero — Michigan Data Science Team

May 2026

- Co-developed a deep reinforcement learning architecture in PyTorch featuring custom convolutional and residual blocks, alongside policy and value heads, to resolve sparse-reward, long-horizon planning tasks.
- Implemented a Monte Carlo Tree Search node structure to map, expand, and deterministically evaluate geometric folding sequences, achieving highly stable intersection-over-union scores across all progressive testing phases.

CLEP Finder Portal — JPMC Code for Good Hackathon (Columbus)

November 2025

- Selected as 1 of 174 participants from over 12,000 applicants to build a responsive, scalable portal for nonprofit Modern States, centralizing nationwide CLEP data to eliminate fragmented university policy tracking.
- Constructed the administrator front-end interface in React, establishing domain-based role detection and secure login permissions to coordinate access control across distinct learner, institution, and admin dashboards.

Big Houses — University of Michigan MHacks Hackathon

September 2025

- Created a student housing platform within a 4-person team, enabling University of Michigan students to browse and filter off-campus listings through a secure web app tailored to minimize search stress.
- Designed core front-end interfaces, including index, login, and explore views, while producing the video demonstration and final presentation to support a polished product showcase under a strict deadline.

SKILLS

Languages: C++, C, C#, Python, HTML/CSS/JavaScript, SQL, Java, MATLAB, R

Frameworks & Tools: Git, React, PyTorch, PySpark, Pandas, Django, Unity, Unreal Engine, Linux/Unix

Additional: REST APIs, CI/CD, Agile/Scrum, Bash/Shell, Blender, Figma, Spanish (Native)
